

ARx COREPOINT™

HIGH SURFACTANT, HIGH PERFORMANCE CROP OIL CONCENTRATE

PRODUCT INFORMATION:

ARx Corepoint is a high surfactant paraffinic oil concentrate that improves droplet spreading, coverage and penetration of the leaf cuticle. It can be used with a broad range of pesticides where crop oil adjuvants are recommended. Care should be taken to avoid phototoxicity when treating sensitive crops during drought stress, high temperatures or high humidity.

DIRECTIONS FOR USE:

Consult an agronomy professional or pesticide application label for specific use rate and application instructions. Always check compatibility with other products prior to use.

USE RATE:

Normal use rate is 0.5 % v/v, or 2 quarts/100 gallons spray solution. Rates are generally ½ of the listed “oil adjuvant” rate on a product label. Rates below 8 ounces per acre are not recommended. Non water-conditioning oil adjuvants such as ARx Corepoint are usually added after all main ingredients of the spray mixture.

Low Use Rate: Can be used at approximately half the use rate of conventional crop oils

High Surfactant Load: Added surfactant helps improve spreading compared to conventional crop oils, improving herbicide control

Compatible: Unlike some crop oils, ARx Corepoint can be used with glyphosate

With phenoxy-class herbicides: Improves the performance of phenoxy herbicides like dicamba and the Enlist products, especially on tough weeds

Low Phototoxicity: Can be safely used in-crop in most situations
